Reading resumé's is tough, here's the basics - I'm a product manager who builds web and mobile software by understanding design. Taking stuff that's super complicated and making it simple and inviting for the end-user. I love seeing users smile when they find that bit that just works.

## experience

### Director, Products - Uniregistry Corp. Newport Beach, CA

- Led the team to release a full domain registrar.
- Built out a \$25m domain marketplace.

### Product Manager - Uniregistry Corp. Cayman Islands

- Designed & deployed our full domain registry.
- Lead the app team on iOS & Android, released what is widely regarded as the best app in the industry.

### Product Manager - Arca Solutions, Sao Paulo, Brasil

- Built the first real time app generator for online directories, build on the web, deploy natively.
- Designed, built and deployed online directory software (eDirectory).

### Product Manager - Copybook, Exeter, UK

- Took 11 sites from concept to completion dealing with B2B companies selling online in various industries.

### Way back when

Before all the above I made movies, I've had my work on the BBC, Channel 4, and films I've worked on have had theatrical releases.

## tools of the trade

At home with Balsamiq, Sketch, Product Board and JIRA. Honestly, there is so much software out there for product these days that you end up being comfortable with it all. Invision, Frammer, Zeplin - used pretty much everything over the last few years.

I work with designers, developers, front-end, back-end, project managers and technical directors. If you have the right team you can build anything.

## education

### Ravensbourne, London, UK

BA Broadcast, Graduated with Honors.

### EDC, Devon, UK.

Psychology, English, Maths, 'Media'.
